42.707 Cost-sharing rates and limitations on indirect cost rates.

(a) Cost-sharing arrangements, when authorized, may call for the contractor to participate in the costs of the contract by accepting *indirect cost rates* lower than the anticipated actual rates. In such cases, a negotiated indirect cost rate ceiling may be incorporated into the contract for prospective application. For cost sharing under research and development contracts, see <u>35.003(b)</u>.

(b)

- (1) Other situations may make it prudent to provide a final indirect cost rate ceiling in a contract. Examples of such circumstances are when the proposed contractor-
- (i) Is a new or recently reorganized company, and there is no past or recent record of incurred *indirect costs*;
- (ii) Has a recent record of a rapidly increasing indirect cost rate due to a declining volume of sales without a commensurate decline in indirect expenses; or
- (iii) Seeks to enhance its competitive position in a particular circumstance by basing its proposal on *indirect cost rates* lower than those that may reasonably be expected to occur during contract performance, thereby causing a cost overrun.
- (2) In such cases, an equitable ceiling covering the *final indirect cost rates* may be negotiated and specified in the contract.
 - (c) When ceiling provisions are utilized, the contract shall also provide that-
- (1) The Government will not be obligated to pay any additional amount should the *final* indirect cost rates exceed the negotiated ceiling rates, and
- (2) In the event the *final indirect cost rates* are less than the negotiated ceiling rates, the negotiated rates will be reduced to conform with the lower rates.
